About Me

I'm a software developer with two years of experience in web application development, specializing in building scalable and secure applications using React.js, Express.js, and Node.js, with MongoDB for database management. I have been actively involved in all stages of the development process, from requirement gathering and architecture design to deployment.

Skills

- React.js | Express.js
- JavaScript | TypeScript
- MongoDB | MySQL
- Redux | Redux Toolkit
- HTML | CSS | Bootstrap
- SPFX | SharePoint
- GitHub
- Core Java

Experience

Software Developer

2023 - present

I have experience in developing web applications and SharePoint applications (SPFx) using the MEAR stack. I am proficient in building secure and scalable REST APIs and have expertise in Git version control, along with deployment knowledge on AWS and Hostinger VPS environments.

Technology Trainer

2021 - 2022

I have one year of experience as a technology trainer in web development and programming, including internship expertise.

Education

Master of Computer Application

Dr. mahalingam college of Engineering and Technology.

2021 - 2023 (CGPA 7.8)

Bachelor of Mathematics

Government Arts and Science college.

2017 - 2020 (CGPA 7.7)

Projects

KidsQatar

(React.js, Express.js, Node.js & MongoDB , AWS)

- Designed as a search engine, it provides detailed information on schools, extracurricular activities, sports, entertainment, events, libraries, and doctors, helping parents in Qatar easily find quality services for their children.
- Implemented JWT for user authentication and integrated Amazon S3 for dynamic asset storage.
- Developed scalable and secure REST APIs, deployed on AWS EC2 for reliability and performance.

POAM

(React.js, SPFX, TypeScript, Pnp.js, App Catalog)

- I contributed to the entire development process of an application using the SharePoint Framework (SPFx) to streamline procurement and travel management processes.
- It enables seamless request submission, approval workflows, and tracking of approval status for both purchase and travel requests.
- It is securely integrated with the office domain using PnP/JS for REST API communication, ensuring efficient data connectivity with SharePoint.

Siri Hr Consultant

(HTML, CSS, Bootstrap, js, AWS)

- It is static website for an HR consulting service company offering expert solutions for recruitment and workforce management.
- I have developed a responsive static website using HTML, CSS, and Bootstrap to showcase services with a professional and user-friendly interface. It is hosted on AWS using S3 Bucket, Route 53, ACM, and CloudFront.
